**Abstract:**

**PURPOSE:** To record a part of a measuring function together with image information and to record remaining information in a data recorder separately provided by constituting a measuring part measuring at least one piece of physical information and/or a character information preparing part so as to be exchanged and connected with a camera main body.

**CONSTITUTION:** The camera main body 1 is placed on a distance measuring instrument 5, and is connected to a GPS receiver 2, a bearing and inclination sensor 3, temperature and humidity and air pressure sensors 4 and various gas sensor 6 through a connecting part 30. On the other hand, the character information preparing part 7 is connected to the camera main body 1 through a cable 34, a connector 33 and the distance measuring instrument 5. Various information related to image photographing is partially written in a frame image, and the remaining information is recorded in the data recorder 30 separately provided. Thus, a necessary measuring function is added at need and information is recorded, and also a part of it is recorded together with the image information and the remaining information is recorded in the data recorder separately provided.
